# ATS

## Verity

**V**

**Verity is the suite's most comprehensive crisis response trainer. This full-scale and table-top exercise tool accurately represents complex disaster environments and allows top-to-bottom response training for live and simulated events.**

**Flexible and scalable, Verity allows multiple organizations to simultaneously participate in customized emergency scenarios. It features operational information, GIS mapping, and reporting tools. It is used by military, government, and commercial organizations to conduct local or geographically distributed exercises.**

## AS  ATSsim

**As a leading national provider of training and operational support technologies, ATS has supported national defense and emergency management communities for decades.**

**ATSsim Suite provides web-based tools that create interactive emergency response training to meet DoD and DHS requirements and ensure readiness. The suite prepares organizations to confront the full spectrum of hazards and threats. It provides crisis planning and response training in simulated environments with progressive options, controls, and complexity.**

**The suite consists of several ATS tools, including Verity, Fusion and Compass. These tools provide experienced personnel the capability to test processes and procedures, evaluate plans, and  assess decision-making during emergencies.**

# CAPABILITIES & FEATURES

★ Web-based constructive simulation for emergency management training

★ Tailored scenarios to test decision-making processes and validate response plans

★ Multi-faceted disaster selection: natural disasters; pandemics; terrorist attacks; active shooter; and chemical, biological, radiological, and nuclear scenarios

★ Customized organizational resources simulating personnel, assets, and capabilities

★ Authoritative models and simulated disaster effects

★ Flexibility to modify scenario organization/effects during an exercise

★ Command and Control, Common Operating Picture, and GIS data integration

## ABOUT ATS

As a leading provider of training and operational support technologies for national defense and emergency management, ATS conducts more than 100 State and Federal interactive and immersive crisis response and consequence management training exercises annually.

Staffed by former emergency management and military leaders, ATS delivers cutting edge technology and innovative solutions to save lives by building resilient organizations.

ATS is a Service-Disabled Veteran-Owned Small Business offering technology and services to increase effectiveness in planning, training, and operations.
